

IMPORTANT

FIGAS Passenger Information Regarding Dangerous Goods

To ensure the safety of our aircraft and all those on board, there are some items which we won't allow you to carry, whether in checked-in luggage or with you in the cabin. These include but are not limited to:

Dangerous goods which cannot be taken onto FIGAS aircraft

Ammunition – cartridges for weapons

Camping stoves containing fuel

Corrosive materials – acids, alkalis, wet cell batteries, etc.

Disabling devices – mace, pepper spray, etc.

Electro shock weapons – such as Tasers

Other dangerous goods – explosives, compressed gases, Lithium batteries, etc.

Explosives – fireworks, flares, etc.

Flammable gas cylinders

Flammable liquids – paint, petrol, lighter refills, solvents, varnish, etc.

Flammable solids – firelighters, etc.

Oxidising materials – bleach, peroxides, some fertilisers, etc.

Strike anywhere matches

Substances liable to spontaneous combustion

Substances that emit flammable gases in contact with water

Toxic (poisonous) substances – weed killer, insecticides, etc.

Dangerous goods which require FIGAS prior permission

The following items can be carried on FIGAS flights, but will require the airline's approval prior to flying, and are subject to further limitations and requirements:

Camping stoves and fuel containers with **no** fuel

Heat-producing articles– underwater torches, soldering irons, etc.

Liquid Nitrogen – tanks for transportation of AI and ET straws

Mercury-filled items– barometers, thermometers, etc.

Non-flammable gas cylinder– as part of a life-jacket

Dangerous goods which require FIGAS prior permission

Scuba Equipment

Oxygen and other small cylinders for medical use

Solid carbon dioxide (dry ice)

Lithium batteries in equipment or as spares (batteries in excess of 100Wh)

Battery powered wheelchairs or mobility aids

Tradesmen's tools – such as nail guns

If you have any other items that you think could be classed as dangerous goods, or are similar to the above, please tell us before submitting them for check-in, either as freight, checked baggage or hand luggage.

Dangerous goods that you can carry on an aircraft

The following items can be carried on FIGAS flights, but with specific limits on quantities or dimensions:

Aerosols – non-flammable for sporting and home use (checked luggage only)

Alcoholic beverages

Cigarette lighter – must be on your person

E-Cigarettes – must be on your person

Devices containing lithium cells or batteries – laptop computers, cameras, camcorders, etc.

Hair-curlers containing hydrocarbon gas – no gas refills

Non-radioactive medicinal or toilet articles – hairsprays, perfumes, colognes, medicines, etc.

Non-flammable, non-toxic gas cylinders – e.g. for operation of mechanical limbs

Spare lithium batteries – rating not to exceed 99Wh(cabin only)

Safety matches– must be on your person

Batteries

Traditional batteries for personal equipment (MP3, watches, cameras etc.) must be fitted to equipment. Any spare batteries should be sealed in their retail packaging. Small Lithium Batteries of up to 100Wh may be carried when fitted to equipment. There is no limit on the amount of spares an individual may take, but they **MUST** be on the person and secured from short circuit. Lithium Batteries for larger equipment such as laptops, power drills and camcorders are generally in the 100Wh to 160Wh range. These are allowed when fitted securely to the equipment but any spares **MUST** be carried on the person and secured from short circuit. A maximum of two spare batteries in this category is allowed. Larger Lithium Batteries (over 160Wh) are not permitted on FIGAS aircraft.

Damaged batteries of any size are not permitted.
